| A storm survey was conducted by the National Weather Service in Fort Worth. An area of damage was observed just south of Pioneer Parkway and west of Roosevelt Drive along Seville Court. One triplex suffered significant damage due to the loss of part of the roof in two places and collapse of part of the ceiling. Minor damage to adjacent homes was also observed. To the south of the damaged triplex, fences were downed and tree damage was observed just south of Arkansas Lane in the Gardens Park area. Wind speeds were estimated at 85 to 90 MPH with an estimated path length of 50 yards and an average width of 20 yards. |                    |                   |                     |                                      |

| This tornado touched down near Sylvania Park, just southwest of the intersection of Beach and Belknap Streets. Severe damage occurred on Wheeler Street from North Beach to Haltom Road, and along Elliott Reeder Road from Haltom Road east approximately a half mile. A fatality also occurred in this area. Substantial roof damage was done to a grocery store, several homes, and a church. Another church suffered steeple damage. Several commercial buildings along Elliott Reeder Road were damaged and numerous recreational vehicles and tractor-trailers were damaged or destroyed. Trees and power lines were also downed. Near the intersection of Riverbend and Jack Newell Roads, a commercial building suffered partial collapse of an east-facing wall. Intermittent damage to trees, fences, and at least one home occurred in the River Trails subdivision, west of the tornado track. The tornado dissipated just west of Precinct Line Road. Winds speeds were estimated at 100-110 MPH. Haltom City and Fort Worth officials estimated about two million dollars in property losses within the two cities. |                    |                   |                     |   |

|---|--------------------|-------------------|---------------------|--------------------------------------|
| A tornado moved through the community of Pecan Plantation, causing damage to trees, tree limbs, roofs, windows, playground sets, and fences. The most significant damage occurred to a brick home on the north side of Equestrian Drive. Portions of the roof were removed, a tree in the front yard was uprooted, the garage door was blown in, and windows were broken. Wind speeds were estimated at 95-100 MPH. |                    |                   |                     |                                      |

| Location   | Date/Time          | Deaths & Injuries | Property & Crop Dmg | Event Type and Details          |
|--|--------------------|-------------------|---------------------|---------------------------------|
| Major flash flooding was reported across the county, and more than 60 people were rescued from floodwaters. One observer reported over 10 inches of rain for the day. A roof of an elementary school collapsed due to the weight of the water. About a half foot of water was reported over streets in Shady Shores, Little Elm, the University of North Texas campus, and along I-35 east service roads. A nursing home and a mobile home park were both evacuated due to threatening flood waters. Several roads remained closed for more than 24 hours, including Corbin Road, Mayhill Road, and East Hickory Street. Several roads and guardrails were damaged by the water. Denton County was declared a disaster area and was therefore able to receive federal aid. At least a hundred people reported flood damage to their local jurisdictions. Some had water 3 feet high in their homes and businesses. |                    |                   |                     |                                 |

| This tornado touched down in Flower Mound, near Bolo Lane just north of Lake Grapevine. Significant tree damage occurred in this area, and a house lost part of it's roof. The damage continued about a half mile east-northeast to Couer Du Lac Lane where the tornado caused substantial roof damage to two homes. Trees, fences, and a horse barn were also damaged in this area. Sporadic tree damage continued east-northeast almost a mile. Here, another subdivision suffered roof damage. Wind speeds were estimated to be 80-85 MPH. |                    |                   |                     |  |
